CNC MACHINIST

☑ General Responsibilities:

- Ability to set up CNC Milling and Turning Machines independently
- Accurately interpret engineering drawings and determine machining methods to meet required part tolerances, fit, and finish.
- Knowledge of G-code and surface speeds and feed rates appropriate for different materials.
- Cooperate with CNC Programmers on machine tool set-up, trouble-shooting and improving programs to maintain machine productivity.
- Maintain stewardship of equipment, and contribute to the maintenance and cleanliness of the shop.

☑ Job Qualifications:

- Machining experience with Haas 3-axis mills and 4-axis lathes with live tooling.
- Able to read blueprints and have a working knowledge of Geometric Dimensioning and Tolerancing.
- Must be competent in shop math, including algebra and trigonometry.
- Experience machining stainless steels and plastics a plus.
- Technical degree preferred or equivalent experience.
- Ability to work and contribute within a team.
